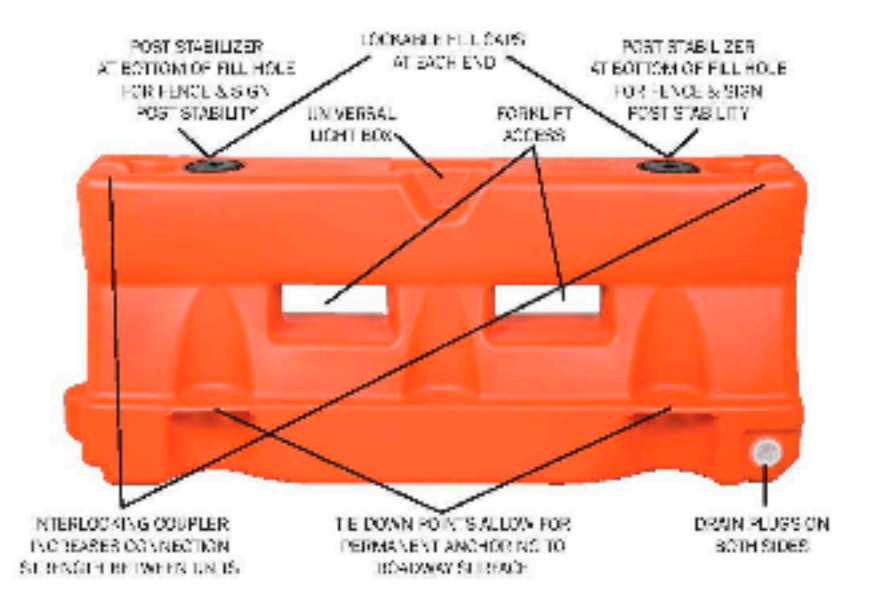
PRODUCT DESIGN & DURABILITY

As with any product, it is only as good as its engineering and design. Now on their third set patents, Yodock has incorporated specific features and benefits to create the most superior water barrier products in the industry. When purchasing products in incorporate into your capital asset inventory, you want to ensure that you are getting the best value-for-money, not the lowest price product.



- **Portability** The forklift holes are located above the center of gravity for ease of transport
- **Tie-Down Holes** Three on each side allows the user to increase stability and decrease deflection
- **Inter-connectivity** Independent Coupling device provides 5000 PSI strength for a stronger connection
- **Filling** Two large fill holes allow for quick filling
- **Draining** Two Drain plugs allow for quick draining. Also allows for safe draining when adjacent to moving traffic
- **Appearance** Due to superior design, the unit does not change shape (bulging) when filled with water
