

# MASONRY 350 Short Cut 14"

## Brick, Block and Paver Saw

The best kept secret in America, the SHORT CUT is built to cut it all. Plug into a 15amp 110v circuit and the SHORT CUT is guaranteed to perform all day long. Cutting bricks, blocks, paving stones, or tile is a breeze on the biggest cutting tray available on a 14" Masonry saw.

### Power

The powerful 1.5 h.p., 15 amp, 110v motor is a reliable jobsite partner. The motor has been specially designed to run on standard household current, without tripping the breakers.

### Accurate Production

The cutting tray roller system is the best in the industry. Load up 4 bricks and cut them in one pass, or cut stone pavers and tile to 1/24".

### Performance

Power is transmitted from the motor to the blade via a ribbed serpentine belt. The belt drive is fully enclosed and self-tensioning. No maintenance means worry free performance!

### 45° Cuts

Want to cut a miter? Simply rotate the cutting head to 45 degrees. No more having to position the brick or block at 45 degrees, the Short Cut 14" does it for you!

### Wheelkit Standard

The legs slide up and away for easy transport and storage. While the wheelkit attaches to the rear legs, this allows the saw to be rolled around by one person!

### Versatility

Plunge cuts are smooth and precise as the cutting head pivots on sealed roller bearings.

### Contractors Speak Up

*I own an IMER Short Cut 14" Masonry Saw and I absolutely love it. I have never had a problem with any of your quality equipment. It allows me to do precision cuts with ease and confidence. I use my saw to cut mostly glass and hard refractory brick.*  
– Jason Ruff, Owner, Epiphany Glass, Pontiac, Michigan

*I am very pleased with my Masonry 350 SC.*

– Anthony St. John, Owner, St. John chimney Sweep LLC, Hopewell, New Jersey

### Short Cut 4"

### Quick Specs

Blade guard capacity	14"
Motor 110v/60hz	1.5 h.p., 110 amp
Motor speed	2,850 r.p.m.
Blade speed	2,250 r.p.m.
Maximum cutting length	18" / 22" w/plunge cut
Max cutting depth 90/45 degrees	4 -3/4" / 2-1/3"
Cutting tray dimensions	20" x 17"
Water pan capacity	7 1/2 gal.
Water pump flow	3 g.p.m.
Weight (boxed)	250 lbs. (290 lbs.)
Noise level	78 db(A)
<b>OPERATING DIMENSIONS (boxed)</b>	
Length	43.5" (45.5")
Width	34" (36")
Height	48" (30.5")
