

More power where you need it

The X-TORQ engine design increases torque over a wider rpm range and results in maximum cutting power.

Improved handle design

The rear handle is asymmetrically designed with comfort inserts for a more solid and less tiring grip.

Optimized saw body

A smooth underside, rounded starter cover and well-protected controls make the saw easy to handle, reduce the risk of getting caught in tree branches and make transportation easier.

Durability

Available with Heavy-Duty air filter.

Air Injection

Air Injection. Centrifugal air cleaning system for longer intervals between filter cleanings, smoother operation and reduced wear.

Smart Start

The engine and starter have been designed so the machine starts quickly with minimum effort. Resistance in the starter cord is reduced by up to 40%.
